

山东科恩表面功能材料有限公司

CrownRe Innovative Materials Corp.

钇铝石榴石 YAG Yttrium Aluminum Garnet Y₃Al₅O₁₂

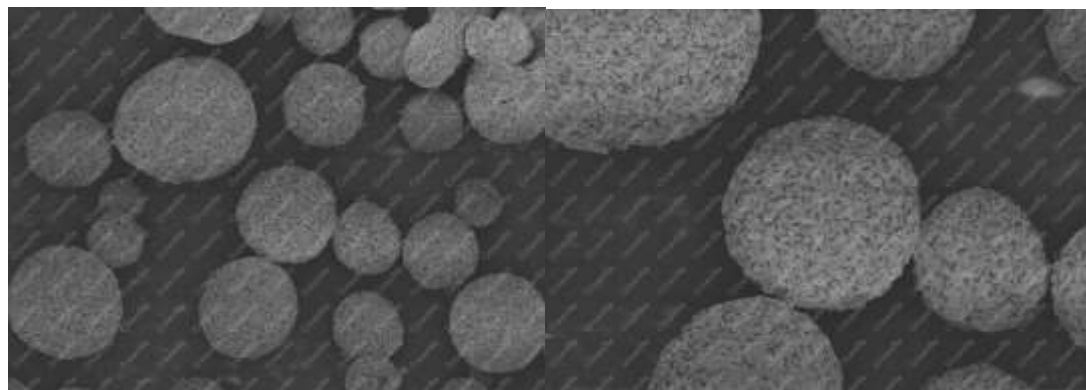

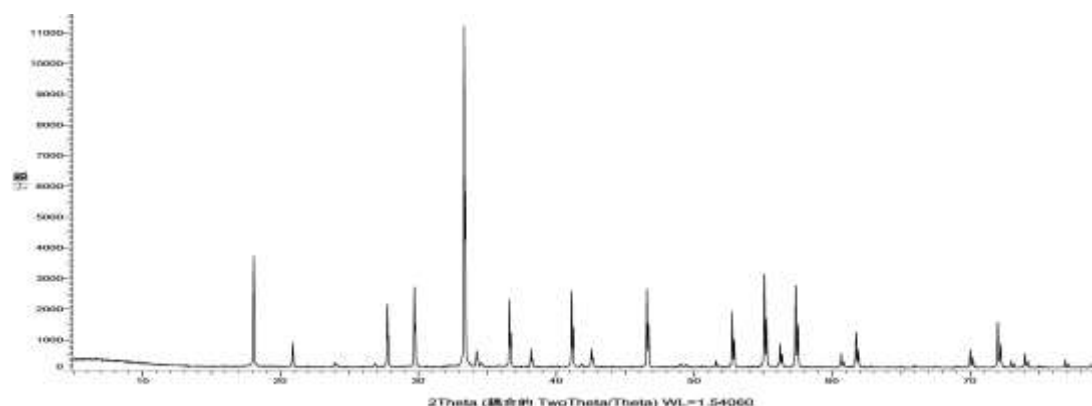

CrownRe 系列 YAG 产品

1. 全部通过高纯度原材料加工, 中间环节少, 杂质含量低; All production is completed with high purity materials, less inner complex process, less impurity;
2. 物相稳定, 硬度高; Phase stable, high hardness.
3. 粒度控制好, 球形形状, 具有非常好的流动性, D₅₀ 37um±3um, D₅₀ 25um±3um; Spherical shape, with better size distribution and good flowability, D₅₀ size 37um±3um, D₅₀ 25um±3um

目前主要应用于激光晶体等领域; Currently, mostly applied in laser crystal field;

另外, **CrownRe** 引进国外先进设备, 可以提供其它物相成分需求的定制生产。Besides, CrownRe also could produce the related ones according to customers' request.
